

Tear-off protection (ARS)

Increased security for locking cylinders

Tear-off protection (ARS)

Technical features

- Additional ARS variant (tear-off protection) for double and knob cylinders
- The tear-off protection (moulded part made of steel) stabilises the locking cylinder in the area of the fixing screw drill hole.
- Tearing or breaking the cylinder off the lock is substantially impeded by the additional ARS variant.
- Effective protection against vandalism and burglary attempts
- Combinable and tested with SKG variants of drilling and pulling protection
 - BN (SKG**)
 - BN3 (SKG***)

Available for double and knob cylinders in Winkhaus systems:

- keyTec N-tra/N-tra+/ON-tra
- keyTec RAP/RAP+
- keyTec RPE
- keyTec RPS (RPS+)
